

## How to utilize the guest wireless network in CCISD

Wireless connectivity is provided throughout all CCISD facilities. Students and staff should always utilize the CREEK-ISLANDS wireless network as their preferred option or utilize the CCISD2 wireless network for devices that only support 2.4Ghz connectivity. This is true for district owned as well as personally owned devices. When guests or visitors enter a CCISD facility without a staff or student account, they should utilize the CCISD-VISITOR wireless network.

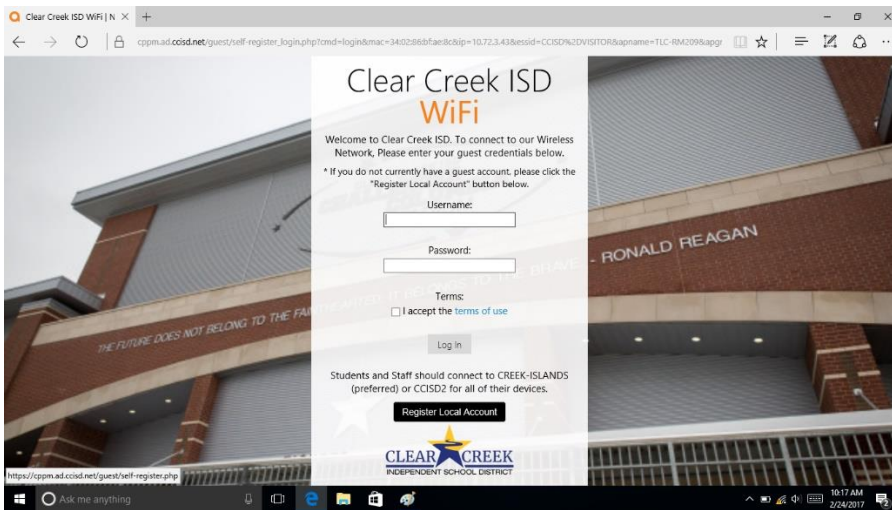

To connect to the CCISD-VISITOR wireless network, first select CCISD-VISITOR from the list of available wireless networks and select Connect.

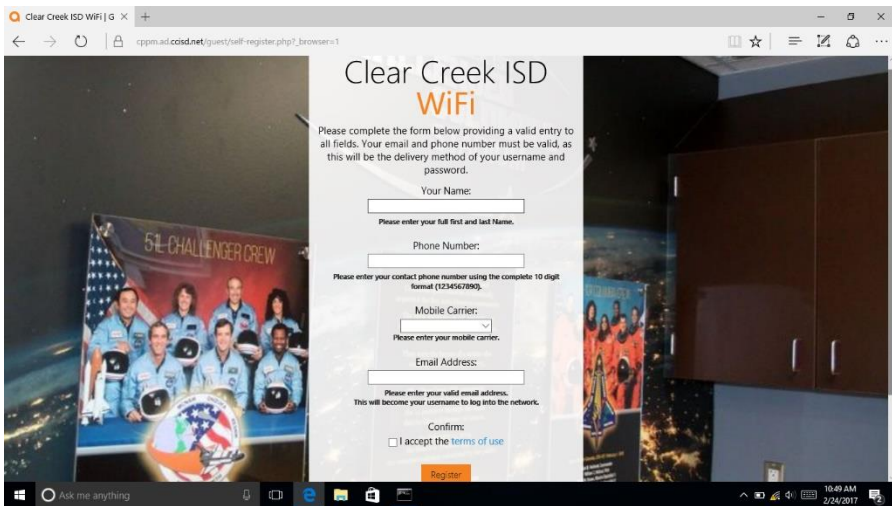

## How to utilize the guest wireless network in CCISD

Once your device is connected to the CCISD-VISITOR network, you will be redirected to a web form to either register for an account, or to enter a currently valid visitor login. To register an account, click the black button labeled “Register a Local Account.”

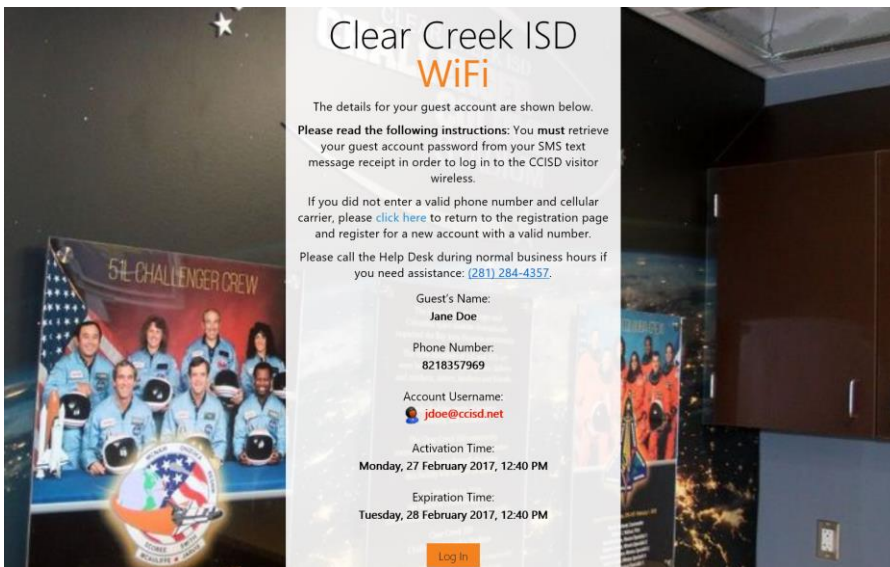

You will then be directed to the page below to enter the information requested. All information is required including a valid mobile phone number with carrier to receive the username and password for the temporary account. You will also need to click the “I accept the terms of use” box and then click Register.

## How to utilize the guest wireless network in CCISD

Finally, you will be redirected to the page below which will give you the information about your temporary account. A text message including your username and password will also be sent to you. Click the Log In button on the bottom of this page and use the username and password sent to you via text message to login to the wireless network.
